

H6c

Pan & Tilt Smart Home Camera

See wider, protect better, care more

It's a simply flexible camera that you can set up indoors as a pet or baby monitor, or use it to add an extra layer of protection in your home. Unlike many cameras that only record at a fixed viewing angle, the H6c rotates to take in a panoramic view in sharp clarity, and can even detect and track motions in a smart way. With the help of the H6c, nothing in a large room will easily escape your attention.

Great vision is the key to reliable protection

Whole-room coverage is a breeze. The H6c helps you keep eyes-open-wide on your indoor space, so even when your cat starts playing hide-and-seek, you can rotate the camera to find where it is. It also renders evenly exposed, clear black-and-white night vision, thanks to its built-in infrared LEDs, so you can enjoy peace of mind while you sleep.

02 Protection lasts, even overnight

Smart enough to detect and track

Upon motion detection, the H6c automatically locks on the subject and rotates to track the activity. Whether your toddler walks by the camera, or your dog chases its toy across the room, the camera will capture those precious moments.

See and talk, from anywhere

Talk to your loved ones and deter unwelcome strangers – all by using the H6c's two-way communication feature. Using the EZVIZ App on your mobile device, you can easily and conveniently enjoy communication wherever you might be.

A visual diary made of precious moments

The H6c ensures that you capture unforgettable moments and store the memories safely¹.
